**Escape M1 Air**

Med 3,5mm optisk utgång och 3,5mm Aux-utgång. Uppgradera Escape P9 med M1 Air. Modulen får plats innanför locket på en Escape P9 högtalare.

2 500 kr st

**M1 Air**

When a problem becomes an idea

Premium Hi-Fi systems are bought to be enjoyed for years. So a lot of people don't want to part with their devices, even if they are not really up to date in terms of high-resolution wireless audio streaming anymore.

That is why we developed the M1 Air streaming DAC. A universal module that can be easily connected to most HI-FI systems and supports 192kHz / 24-bit hi-res audio files.

The M1 Air is equipped with Chromecast built-in, AirPlay 2, Roon, Spotify Connect and Bluetooth 5.0. This allows you to easily stream music services such as Spotify, Apple Music, Tidal, Qobuz, airable internet radio or podcasts from a smartphone or other mobile device.

AirPlay 2

airable	Spotify	Apple Music	TIDAL	qobuz	YouTube Music
Works with Apple AirPlay		Chromecast built-in	ROON READY		

Easily connects to a WIFI network via iOS or Google Home

The M1 Air easily connects to a wireless WIFI network via iOS (Apple AirPlay 2) or Google Home App (Android and iOS). The M1 Air supports various systems for multi-room Hi-Res audio streaming over WIFI.

Download the Google Home App from the Google Play store (Android devices) or the Apple App store (iOS) and use this app to pair the M1 Air with an existing WIFI network.

Upgrade the P9 with the M1 Air module

Also the P9, the top model of the P series, can be expanded with the M1 AIR module. For this purpose a special compartment is provided under the keyboard that is already equipped with a separate audio input (AUX2) and a USB power supply connection.

Digital interface - interaction via a customized ESCAPE™ REMOTE APP for both iOS® and Android<small class="tm">™</small>.

Specifications

- Supports various systems for Hi-Res Multi-Room audio streaming (192KHZ/24-bit) over WIFI including Chromecast built-in, AirPlay2, Roon Endpoint and Spotify Connect. Lossless Audio Codec, Flac, APE and DSD support.
- Apple® AirPlay 2 chipset
- WIFI 1 x 1 Dual Band 802.11 a/b/g/n/ac
- Bluetooth® 5.0

- Combined 3.5mm analog + digital optical toslink output. Maximum preamp output voltage (audio volume) adjustable via the Escape™ Remote App in two levels: 1 Volt default set for use with the P9 (!!) 2 Volts when the HIFI installation requires a higher output voltage. (!!) Do not change the maximum output voltage to 2 Volts when using the M1 AIR in combination with the P9.
- THD + Noise < 0.06%. Frequency Range 20Hz - 20KHz
- Product dimensions 89mm (L) x 45mm (W) x 18.9mm (H)
